

Geologic Sequestration (GS) Data Tool Electronic Signature and Use Agreement

The electronic submittal of Class VI permit application and reporting information to the U.S. Environmental Protection Agency (EPA) requires the creation and maintenance of a user account for the GS Data Tool. I have reviewed and agree to the following conditions for the access and use of the account for the proposed Class VI project named below:

- (1) I understand and agree that I will be held as legally bound, obligated, or responsible for any electronically signed submission I make as I would be by making such submission in hardcopy form with my handwritten signature;
- (2) I agree to maintain an email account. If any email sent to me by EPA is returned as undeliverable, I will explain why this occurred when requested by EPA;
- (3) I agree to protect the project's user name and password from use by anyone except the individuals authorized to submit information for this project. I will not divulge or delegate the user name or password to any unauthorized individual. I will not store the password in an unprotected location and I will not allow the password to be written into computer scripts to achieve automated login;
- (4) I agree to contact EPA as soon as possible after suspecting or determining that the user name and password have become lost, stolen, or otherwise compromised, or of any other security incidents; and
- (5) I agree not to attempt to view, change, or delete data unless I have the authorization to do so. I agree to behave in an ethical and trustworthy manner and to be alert to threats to applications and data.
